SUMMARY

Data analyst and web developer. I build the SQL and Access pipelines and the Tableau dashboards behind institutional reporting at Nicholls State University, and full-stack web platforms that members and patients use every day. Looking for a data analyst, BI or full-stack role in New Orleans or anywhere the work is a step up, including relocation.

SKILLS

Data & analysis: SQL, Microsoft Access, Python (pandas), R, Excel; cohort and funnel analysis, data validation, hypothesis testing, KPI reporting

Visualization: Tableau (dashboards, executive reporting, design systems), Power BI

Web & software: JavaScript / TypeScript, React, Node.js, HTML / CSS, Git, Cloudflare (Workers, Pages, D1), WordPress

Platforms: Banner ERP, Slate CRM, Qualtrics, Jenzabar, Stripe, Supabase, Asana, MS Project

EXPERIENCE

Data Analyst

Mar 2025 – Present

Nicholls State University, Office of Institutional Research | Thibodaux, LA

- Build and maintain 30+ Tableau dashboards on admissions, enrollment, retention and graduation for university leadership and the public, using data from Banner ERP and Slate CRM.
- Redesigning and rebranding the office's Tableau catalog onto one written design system and brand standard; wrote Python scripts that apply it by rewriting each workbook's XML and check every file's structure before it is published.
- Built Nicholls State's first predictive student-retention system end to end, integrating 15+ institutional data sources and validating logistic-regression models across four years of outcomes; achieved 0.747 held-out AUC for first-time freshmen and 0.80 year-over-year AUC for continuing students.
- Run Qualtrics end to end, from survey design to extracting and transforming results for reporting.
- Support faculty research and department heads' initiatives with data pulls, analysis and reporting; turn findings into written reports and presentations for senior leadership and task forces.

Webmaster (part-time)

Jun 2025 – Present

Louisiana Chess Association | LouisianaChess.org

- Built the association's platform from scratch to replace a Google Sites page and a third-party registration site (React, TypeScript, Cloudflare Pages Functions, D1, Supabase, Stripe, Resend); launched July 2026.
- Tournament registration and payments, a FIDE Dutch pairing engine, a club directory with map, memberships and admin tools; 50 integration and 62 unit tests run in CI on every change.
- Built a scoresheet scanner (live September 2026): a vision model transcribes handwritten moves, then a legal-move search corrects them; profiling cut decode time 8–16x, run in a Web Worker.
- Audited the code before launch and fixed an unverified Stripe webhook and an endpoint that exposed contact-form messages.

Web Developer and IT Support (part-time)

Dec 2025 – Present

Healingly, telehealth | Remote | Healingly.net

- Designed and built the practice's website on WordPress and Kadence: services, up-front pricing, and a symptom selector that routes visitors to booking.
- Integrate and administer Stripe and OptiMantra; showing each patient only the consent forms for the service they booked reduced intake drop-off. Primary contact for web and software issues.

Seafood Department Manager

Feb 2018 – Jun 2022

Bayou Lagniappe | Berwick, LA

- Led and coached frontline staff; managed inventory, ordering and quality assurance.
- **Award.** Employee of the Year for St. Mary Parish, 2018 – the youngest person to receive the award.

PROJECTS

- **KobiLipari.com.** Portfolio built with a dependency-free Node static site generator on Cloudflare Workers; includes an in-browser SQL playground (sql.js) and a before/after rebuild of two Nicholls dashboards from their published data.
- **Student withdrawal early warning.** Pre-registered analysis of 32,600 Open University course registrations in Python: a 15-check data-quality audit, hypothesis tests, a risk model that flags students likely to withdraw, and a fairness review across student groups, backed by 43 automated tests including a leakage check.

EDUCATION

B.S. Computer Science, University of Louisiana at Lafayette

2019 – 2024
